

High Performance Single Polarization Parabolic Antenna

The HAP parabolic antenna from SVP Broadcast Microwave is a single polarization antenna, with a 90 cm diameter. This antenna work in the 7 and 10 GHz frequency bands.

It has has been specially designed to be used in portable SVP Links. So it can be clamped to the RF head of SVP equipment.

The reflector is made of aluminin and it has an external ring, which increases the robustness of the structure. The feeder has a quickset system and can be clamped to the antenna without screws.

The HAP antenna offers the best performance and a long useful life is guaranteed. It can be used in the most adverse wheather conditions.

Design and specifications are subject to changes without prior notice. 01/19

Characteristics

HAP_90

Frequency band:	7 and 10 GHz (in bands)
Bandwidth:	400 MHz
Gain:	Depends on the frequency
Polarization:	Linear
VSWR:	Typ <1.8
Connector:	N male
Diameter	90 cm
Weight:	7.5 kg
